

## DNA TESTING - HOW IT WORKS:

- Your samples may be collected in our office, your home, by a mobile collector or in many affiliate laboratories nationwide
- Samples can be collected through a completely painless cheek swab
- Results routinely returned within one week. STAT results also available.
- Testing can also be performed prior to the birth of a child. We have experienced prenatal specialists ready to help you.
- Many people have unique circumstances. We have experienced professionals to work with you and meet your special needs.

# DAD TEST™

## DNA

### Identification Testing

## DNA TESTING - HOW IT WORKS:

DNA testing is the process of examining an individual's genetic material for the purpose of genetic identification and to determine the relationship between two people.

The genetic characteristics of the child are compared to those of the man being tested. If the tested man (alleged father) does not have the genetic characteristics necessary to be the biological father of the child, he is excluded. If the tested man's DNA does contain those genetic characteristics, then the probability that this man is the true biological father can be calculated.

## WHO NEEDS DNA TESTING?

- A woman seeking child support
- A man attempting to win custody or visitation
- Adoptive children seeking their biological families
- Persons seeking to determine inheritance rights
- Someone wanting to determine grand parentage
- Determining whether twins are identical or fraternal
- Immigration

“The truth can make a difference in the way a life is lived. When paternity is an issue, it’s best to get an accurate, conclusive answer as soon as possible.”

## ACCURATE:

DNA testing is the most accurate way of determining identity. Our testing examines the DNA more than 10 times on every sample! There is no more accurate way of establishing an individual's true identity.

## CONCLUSIVE:

DAD TEST™ DNA testing is legally conclusive. What this means to you is that you have the final, accurate answer to your question, and there can no longer be any doubt about the truth.

## CONFIDENTIAL:

Scheduling and testing are completely confidential. You tell us who will receive your test results. No one will know your test results without your authorization.

*Confidential Conclusive Accurate*
